Office Action Summary	Application No. 10/709,763	Applicant(s) PASTORE ET AL.	
	Examiner RAMON O. RAMIREZ	Art Unit 3632	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Detailed Action

This is the first Office Action corresponding to original filing. The application contains 18 claims.

Drawings

The drawings have been accepted by the examiner.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-6, 10-12, and 16-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Veltri et al. (Pat No 6,641,102). The patent to Veltri et al. discloses an adapter for holding fast food container in a cylindrical automobile cup holder, comprising a lower member (30) and upper member (20) defining by a plurality of upper members. As to claim 5, not to make the lower member hollow is considered as an obvious matter of engineering choice, as admitted by Applicant. As to claim 10, the material from which the upper member is made of is considered a matter of expediency; for example, to make it of flexible material would provide for a more secure fitting for the food container. As

to claim 11, the patent shows four upper members but it can be formed with two if desired without affecting the performance of the device. As to claim 12, the shape of the upper members can be cylindrical as a matter of engineering choice.

Claims 7-9, and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Veltri et al. in view of Van Buren (Pat No 3,298,646).

The patent to Van Buren teaches the use of ribs/strips as reinforcement means. Even though Van Buren shows the ribs on a planar surface, it would be expected to provide them on any type of surface with the same results. The number of ribs used and the shape of them are considered as obvious matters of engineering choice.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 13 and 14 are rejected under 35 U.S.C. 102(e) as being anticipated by Veltri et al. As described above, Veltri et al. disclose means for fitting the adapter to an automobile cup holder and means for holding and stabilizing a container.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Sarullo, Cassetari, Ken-Fawkes, Thomas, Osborn, Ney and Dane show other devices of interest.
